I've been a XM subscriber going on 2 years. I urge the FCC to reject the NAB's petition 04-160. I'm also a commercial truck driver and have been for 17 years, over the road from 1995 to 2003. Driving through out the country its enjoyable to set a program and have the listening capability til you decide when to change programs. The new traffic and weather channels are great. I know without a doubt they're used by the thousands of commuters and truck drivers . Having a clear uninterrupted channel informing of trouble spots are necessary to traveling on schedule. My wife uses it through the week as a salesperson and gets the same enjoyment from it as I did traveling. Set a program and listen all day or night. On weekends it gets used in the home for enjoyment while relaxing or working. This is legal entertainment XM responded to and the consumers pay for. Leave it alone!
